6289686804015 | agungprsty423@gmail.com | <https://www.linkedin.com/in/ag-prasetyo/> | <https://github.com/agungprsty>

Backend Developer with 5+ years of experience engineering production-ready systems using Python, PHP, and Go. Proven track record in designing scalable RESTful APIs, optimizing database performance, and driving integration efficiencies. Experienced in agile environments and passionate about building robust backend architectures and cloud-native solutions.

Pengalaman Kerja

PT Digital Sekuriti Indonesia - Yogyakarta <i>Backend Developer</i>	Jan 2024 - Sekarang
- Developed and maintained RESTful APIs serving thousands of daily users with high availability and stable performance - Integrated 10+ third-party APIs, reducing manual processing time by up to 40% - Designed and optimized backend services, improving data exchange efficiency by 30% - Optimized complex PostgreSQL/MySQL queries and implemented Redis caching, reducing average API response time by 35% - Architected and deployed scalable microservices using Python (FastAPI) and Node.js, containerized via Docker to ensure environment consistency - Streamlined frontend-backend integration, decreasing API error rates by 25% - Implemented automated unit testing, achieving 80%+ code coverage - Identified and resolved critical performance bottlenecks and security vulnerabilities in production environments, reducing system downtime and ensuring data integrity - Spearheaded the refactoring of a monolithic legacy codebase into clean, modular structures, improving maintainability and reducing technical debt for future feature deployments	
PT Digital Sekuriti Indonesia - Yogyakarta <i>Junior Web Developer</i>	Jun 2021 - Dec 2023
- Developed 5+ responsive web applications that improved mobile user engagement by 20% and ensured cross-device accessibility - Improved website loading speed by up to 30% through advanced asset optimization, minification, and implementing efficient browser caching strategies - Enhanced user interaction and front-end responsiveness by developing dynamic interactive components utilizing JavaScript and jQuery - Converted UI/UX designs from Figma into functional web applications using AJAX and JSON - Collaborated with a cross-functional team of 6+ engineers and designers using Git-based workflows, reducing code conflict resolutions by 15%	
PT Forta Digital Teknologi - Jakarta <i>Warehouse Lead</i>	Sep 2020 - May 2021
- Led daily operations for a team of 10+ staff members, strengthening communication and improving overall team productivity by 15% - Improved inventory accuracy by 20% through systematic audits and documentation - Trained employees on safety standards, reducing workplace incidents	
PT Forta Digital Teknologi - Jakarta <i>Office Boy</i>	Oct 2019 - Aug 2020
- Maintained the cleanliness and tidiness of office facilities, supporting daily operations of 30+ employees - Supported company events and activities, contributing to employee engagement	

Jenjang Pendidikan

Universitas Teknologi Digital Indonesia - Yogyakarta <i>Bachelor of Informatics Engineering, 3.66/4.00</i>	Jul 2021 - Dec 2025
- Graduated with Cum Laude honors (GPA ≥ 3.50) - Completed degree in 3.5 years while working full-time - Demonstrated strong time management and self-discipline balancing work and academic responsibilities	

Technical & Professional Skills

Databases & Tools: MySQL, PostgreSQL, MongoDB, Redis, Git, Docker Languages & Frameworks: Python (FastAPI), PHP (Laravel), Go, JavaScript, Node.js Soft Skills: Team Leadership, Time Management, Cross-functional Collaboration, Problem Solving. Languages: Indonesian (Native), English (Professional/Working Proficiency), Japanese (Conversational)
